BE-5301 | Round Deheading Table

Next Generation of Highly Efficient Deheading.

- Streamlined workflow from deheading to filleting.
- Tailored for salmonids.
- Ergonomic workstations with hydraulic adjustment options.
- Effortless fish handling: no lifting required.
- Configurable for left- or right-handed deheading.
- Options for 2-4 deheading stations, with pace control for up to 30 fish/min.
- Durable, hygienic open-frame design.
- Water spray guns at every deheading station.

BE-5301

Round Deheading Table

The BE-5301 integration streamlines your production process by significantly reducing the need for manual fish handling and lifting. This enhancement optimizes workflow and enables a consistent operation pace, allowing for up to 30 fish to be processed per minute. Such efficiency not only boosts throughput but also enhances the overall quality and yield of the deheading process.

Designed for salmonid processing, the deheading table is robust, stable, and meets strict hygiene standards. It integrates easily into existing lines, offering adaptability for various capacity needs. With its ergonomic design, including height-adjustable platforms, the BE-5301 ensures a comfortable working environment that meets industry standards.

Machine

Model	BE-5301
Dimensions Diameter	1820 mm
Capacity	Up to 30 fish/min
Power Consumption	2.4 kW
Electricity	3 x 400V + N + PE / 3 x 220V + PE
Weight Approx.	900 kg
