

# BERITECH

Solutions Driven by People.

## BERITRAY | Tray Tool System

### BE-8100 Tray Tool

- 100% electrically driven.
- Designed for easy changeover from one tray model to another.
- Includes dual tray orientation capability as standard.
- Designed for industrial use and cleaning.
- Produced with standard components, ensuring low maintenance costs.

# Redefining Standards in Tray Separation.

Elevate your production line with Beritech’s innovative denesting solutions. Engineered and designed by industry experts, BERITRAY offers unmatched efficiency and quality. With customizable configurations tailored to accommodate specific tray types, this solution ensures seamless integration and precise separation for processing needs.

## Size Matters

The machine setup is adapted based on informed strategies. Additionally, the receipt system is designed to

efficiently manage transitions between different tray types and sizes, improving operational performance.

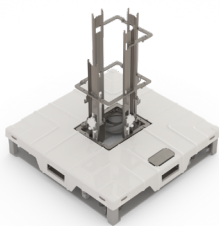

## Hygienic Design & Performance

The BERITRAY series emphasizes high hygienic standards and superior quality in its design. Utilizing advanced technology, it reduces maintenance requirements and effectively minimizes annual costs, keeping production lines operational.

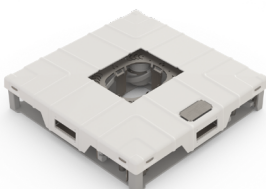

### Advanced Features

- ✓ **Low Maintenance Cost**  
Made with standard components for straightforward servicing.
- ✓ **Unique Tray Separating Screws**  
One-size-fits-all solution for handling a broad range of tray types.
- ✓ **Advanced Electrical Control System**  
Complete electrical control with adjustable speed, configured for signal exchange with external equipment.
- ✓ **Automatic Self-Correction**  
The tray tool features an automatic self-correction function, re-lifting and repositioning trays to correct handling errors.

Model	BERITRAY BE-8100
Dimensions LxWxH	615 x 615 x 1198 mm
Capacity	1 - 200 trays/min
Weight Approx.	13 kg
Tray size - Max	325 / 265 mm
Tray size - Min	90 x 90 mm
Noise Level	70 dB
