## BE-1826 | Box Forming Machine for Lids

- High Capacity.
- 400 pieces in the magazine.
- Polished stainless steel.
- Can be equipped with printers.

BE-1826

### Box Forming Machine for Lids

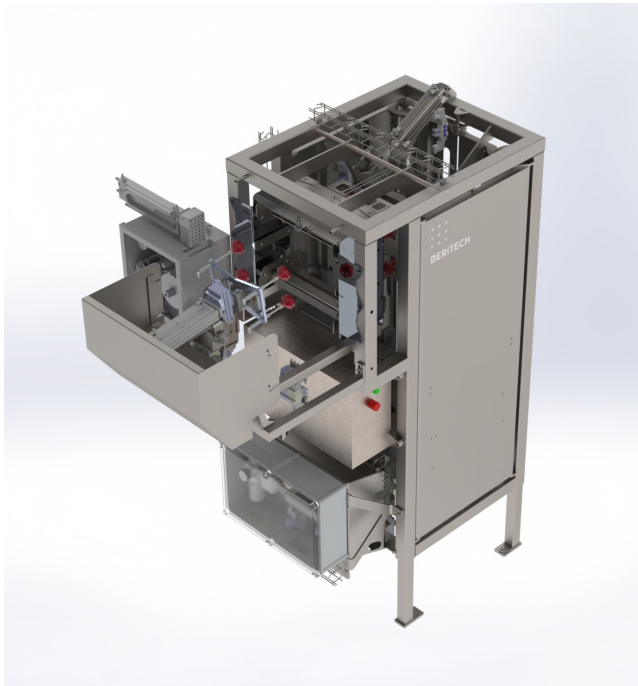

The BE-1826 specializes in forming lids for 5 kg cartons, ideal for packaging shell-on shrimp. Integrated with a carton magazine, this machine is a key component of an automatic line, efficiently delivering lids to

weighing stations. Equipped with a 400-piece magazine, flat sheets of carton are pneumatically conveyed to the forming unit.

The machine's forming head meticulously folds and locks the parts, eliminating the need for glue. Designed with user-friendliness in mind, the BE-1826 allows for simple switches between different operations, such as adding labeling functionalities at one or both ends of the lids. Its stability and precision ensure the production of perfect boxes every time.

Labeling capacities vary based on configuration, with 9 to 12 pieces per minute for single-end labeling and 7 to 9 pieces per minute for both ends. Additionally, formed lids can be directed above the packing area or to a pickup slide, with capacity influenced by the chosen setup.

**Machine**

Model	BE-1826
<b>Dimensions</b> LxWxH	1680 x 734 x 2100 mm
<b>Magazine Capacity</b>	400 pcs
<b>Capacities</b> Label one end	9 - 12 boxes/min
<b>Capacities</b> Label both ends	7 - 9 boxes/min
<b>Air Consumption</b>	250 NI/min
<b>Power</b> 3x440V, 60 c/s	0.25 kW/10A
<b>Weight Approx.</b>	400 kg
