Solutions Driven by People.

BE-5351 COMPACT PRO | Filleting Machine

Optimized Yield Performance

- Maximizes valuable yield count from every fillet
- Handles large and irregular fish simultaneously
- Delivers strong, reliable, high-performance operation
- Ensures stable, consistent cutting results – no yield fluctuation

Easy Service & Maximum Uptime

- Engineered for high uptime and stable performance.
- SCADA system ensures reliable monitoring and fast troubleshooting.
- Standard components allow quick, easy service and replacement.
- AR support enables efficient remote assistance anywhere.
- Recipe-based control and user-friendly display simplify daily operation.

Hygienic Design & Food Safety

- Hygienic open-frame design – easy to clean.
- Ensures optimal food safety and regulatory compliance
- Industry 4.0 ready – full data integration for traceability

Precision on Demand.

The BE-5351 COMPACT PRO represents a new generation of intelligent filleting technology. With its patented recipe-based control system and hygienic open-frame design, it fillets salmon and trout to perfection without compromising yield, uptime or hygiene.

Every detail is engineered to maximize valuable output, reduce by-products and create measurable value for processors. The compact footprint makes it ideal for modern production environments seeking efficiency and reliability.

Advanced Features

✓ **Engineered for Reliability**

Downtime is the enemy of productivity. That's why the BE-5351 is designed for **unmatched operational stability**. Its built-in troubleshooting system pinpoints issues instantly, while **AR-powered remote support** ensures fast, efficient service no matter where the machine is located. Standardized components make replacements quick and simple, keeping your line running at full capacity.

✓ **Intelligent Control. Consistent Results**

The "GUIDED CUTTING MOTION" function automatically adapts to each fish's size and shape, ensuring **optimal precision and minimal waste**. The machine handles **large, irregular and standard-sized fish simultaneously** with consistent accuracy and quality. Combined with an intuitive operator interface and a design built for hygiene and easy service, the COMPACT PRO ensures **maximum yield, stability and performance – every single day**.

Model	BE-5351
Dimensions LxWxH	2900 x 1550 x 2400 mm
Capacity	Up to 25 fish/min
Operators	1 person
Belt Speed	380 mm/sec
Fish Size / Width	1,5-9 kg / max. 120mm
Fish Height / Belly Height	max. 80 mm from center bone / to center bone
Fish Type	Salmonid species, including irregular production fish with thick or fused backbones
Power Consumption	4 kW
Water Consumption	12-15 L per min.
Air Consumption	40-80 L per min.
Electricity	3 x 400V+N+PE
